From our Sponsor

Little did we think, five years ago, that our *Camellia sasanqua* 'Starry Eyes' hedge would have eight just like this one all in a row and doing such a fabulous job on our western boundary . (Photo D. Low)

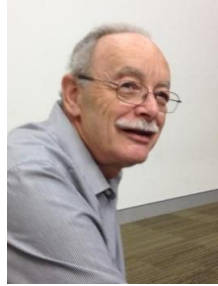

We had so many
entries in our
show and in our
garden that we
are issuing a
Supplement to the
August Edition

BONUS EDITION

PRESIDENT'S REPORT

This special "Supplementary Edition" will feature more of our members' blooms that were entered in the "On-line Show".

Your Committee met and the following items of interest were noted:

1. The Current Balance in our Cheque Account is \$3,554.61
2. The Current Balance in our Term Deposit is \$16,693.42
3. We have been able to keep our term deposit untouched due to the receipt of our royalty payments.
4. All prizes and certificates from the Show were delivered with only one to be collected personally in September. Our thanks go to Neutrog for their Prize Packs and to Camellia grove for their beautiful plants.
5. The Spring Delivery from Neutrog is on track for collection on the 29th of August from Juliet Muras' home.

Two of our members have resigned their membership for health and family reasons. Mrs Pullen asked us to take Geoffrey off our mailing list as he can no longer read our journal and Ralph Davidson resigned from the Society with his Household membership as Ralph explained, his wife is too feeble to walk and he will be moving into aged care himself shortly. Ralph also asked me to contact Camellias Australia to cease their Journal delivery.

These families have been Life Members for a considerable time and our thoughts and best wishes go out to them.

Helen Wallace informed us that Camellia Grove have produced a number of potted 'Eryldene Excelsis', 'Eryldene Excelsis Variegated' and 'Oki-No-Nami'. We will let you know where and when they may be bought and collected from, as soon as we know.

Daniel Low
President, NSW Camellia Research Society

More Flowering Anomalies this Month

Not only has Margaret Davis continued to produce a red sport (remembering that Otahuhu Beauty is not on that part of the genetic line), but now our Hawaii has had some reversionary flowers of C.M.Wilson (they are in the same genetic line).

A CAMELLIA OF INTEREST AT ST. MARTINS, KILLARA

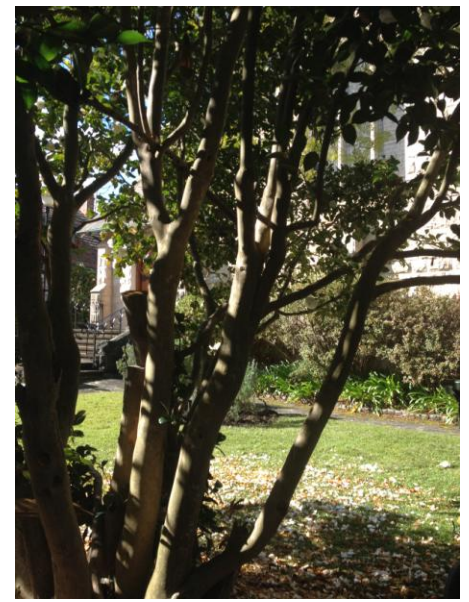

C.G. LOW

St Martins Anglican Church at Killara is home to a very old Camellia of interest. The Rev. Matt Heazlewood spoke to me a few weeks ago as I was taking photos nearby and from his driveway. He asked if I could come to see the camellias in front of the church from the Arnold St. entrance. One very large tree with multiple trunks and covered in medium, white, formal double blooms with occasional pink streaks takes your attention immediately. At the presentation of the ICS Certificate to the Eryldene Board at the church, Dr Stephen Utick had a look at the tree and closely at its flowers and was of the opinion that it was 'Contessa Calini'.

This variety has been known to collectors since Fratelli Ravelli listed it in his Catalogue in 1852, and to find it in Killara is quite unusual. It is known elsewhere in Australia as it is listed in the "2019 Nomenclature of Camellias in Australia".

Two Different Views of the Flowers

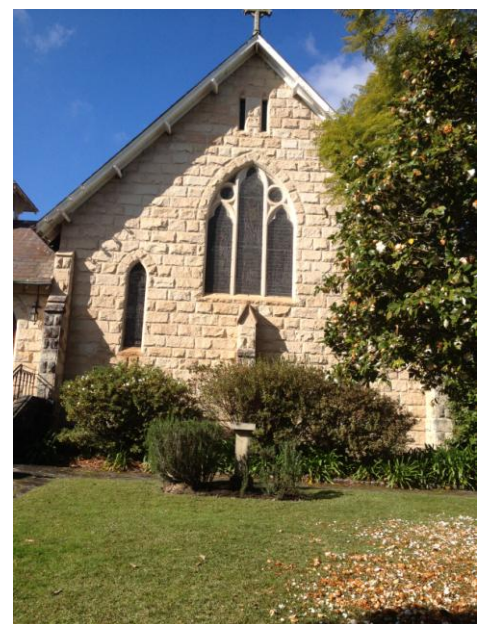

The Multiple Trunks

The Largest Part of the Trunks

The Tree by the Church – Two Perspectives

As the church was built in 1910, it may be assumed from the trunk size, that the tree may have already been in the grounds had been planted shortly after.

LET'S KEEP OUR GARDENS IN PEAK CONDITION

Seasoned performers for **Spring**

Whoflungdung is a biologically activated, nutrient-rich, weed-free, absorbent super mulch that introduces a wide diversity of beneficial bacteria to the soil.

Kahoonna is ideal for all acid loving plants such as Camellias, Gardenias, Azaleas and Rhododendrons

GOGO Juice is teeming with beneficial microbiology and is essentially a probiotic for your soil and plants. GOGO Juice combines the "catalytic" power of the billions of beneficial bacteria with the well documented benefits of applying kelp, seaweed, fish and humic acid.
